

## **6175 Field Trips and Off-Campus Activities**

Extending the classroom outside the school building allows the community and schools to work together to provide a meaningful learning experience. By taking students to places and events within the area, they become engaged in a meaningful learning experience and have the opportunity to extend the classroom into the real world.

Field trips and off-campus activities allow students to utilize facilities not available at every school site.

Field trips and off-campus activities provide students a safe learning experience directly related to the District curriculum.
